GLOBAL POLICY FORUM

The war in Ukraine is causing a humanitarian crisis and has profound consequences for global governance, not least for the ability of the international community to address global challenges, from post-Covid recovery to healthcare, from climate change to the SDGs and digital transformation.

Against this background, [ISPI](#), [Bocconi University](#), [OECD](#) and [T20 Indonesia](#) are co-hosting the II edition of the **Global Policy Forum (GPF)** on **20-21 June**. This hybrid international event on the prospects for peace and cooperation will bring together at Bocconi University (in Milan) thought global leaders and senior experts. As a **milestone event of Think20 (T20) Indonesia**, this event also aims to provide actionable policy recommendations to the **G20 countries**.

The event will be also live-streamed to the public at large.
